ABOUT

I'm a frontend developer with a background in architecture, combining creative thinking with problem-solving skills. After more than 10 years of designing physical spaces, I discovered my passion for coding and building digital experiences. I love seeing instant results, refining designs through quick updates, and creating interfaces that feel intuitive and engaging. Skilled in React.js, JavaScript, HTML, and CSS, I enjoy bringing structure and aesthetics together in my work. Always curious and eager to learn, I am looking for a role where I can grow as a developer and contribute to meaningful projects.

PERSONAL INTERESTS

I'm passionate about staying active and creative. I enjoy running to clear my mind and participate in yearly running events, practicing adult ballet for both discipline and expression, and experimenting with mixology to craft unique and delicious cocktails. Photography allows me to capture my environment blending my love for aesthetics with storytelling.
